PASSION AND CARE

In the Deroni Gardens, the tomatoes have the good fortune to find the best conditions to grow. Our land is healthy and fertile because of the **natural green mass**. The drip irrigation system in our fields gives clear filtered water to the tomatoes. All our fields are drained so that in heavy rains, the water immediately drains and does not remain on the surface. The tomatoes grow perfectly under the warm southern Sun in the heart of Southern Bulgaria. Specific technological lines for producing **green tomato paste** in our factories.
