Delicious Food from Nature

Founded in 1991, DERONI is a modern European food producer with three manufacturing plants, 14 production lines and more than 250 articles, supplying partners in over 34 countries worldwide.

Our greatest advantage is our own gardens.

Across **3.15 million square meters** of irrigated agricultural land, we cultivate a significant portion of the raw materials used in our production. We operate our own seedling production facility and grow more than **25 million vegetable plants annually in 24 greenhouses**. This means we control the entire process, starting from the very first stage of cultivation. In Deroni Gardens we grow tomatoes and cherry tomatoes, red and green pepper, aubergines, gherkins, fresh garlic.

Our recipes are built with vegetables from our gardens, delivering authentic taste and premium quality.

During the harvesting season, an average of **60–70 tons of fresh vegetables** are picked every day. Only a few hours after harvesting, these vegetables enter our production facilities, where they are processed. This unique connection between agriculture and manufacturing allows us to preserve the natural taste, aroma and quality of every ingredient.

ingredients make the difference

At the heart of Deroni products are carefully selected ingredients, many of which come directly from our own gardens: tomatoes, roasted peppers, roasted aubergines, fresh garlic and fresh basil, parsley and other spices, extra virgin olive oil, naturally brewed soy sauce with up to six months of natural fermentation.

3 factories | 14 technological production lines

The second new production factory Deroni – Stara Zagora

Deroni operates 3 production facilities equipped with 14 technological production lines. This enables us to manufacture a wide variety of product categories and successfully serve retail chains, foodservice operators, and industrial customers. By combining advanced manufacturing technologies with our own agricultural production, we achieve outstanding quality, flexibility and reliability.

modern food for modern customers

Deroni continuously invests in innovation, technology and product development. Our goal is to combine traditional culinary values with modern consumer expectations. That is why we develop products featuring: **natural ingredients, no added preservatives, no added sugar product ranges, clean label recipes, naturally delicious taste**.

our commitment & philosophy

Thanks to our own agricultural production and modern manufacturing facilities, we are able to create premium-quality products at competitive prices. We control every step of the process – from seedling cultivation and harvesting to production and final packaging. This allows us to offer our partners and consumers not only great food, but also **trust, traceability and consistent quality**. At Deroni, we believe that great food begins in nature. Every product reflects our commitment to authenticity, freshness, responsible production and outstanding taste.

DURING THE SEASON, **EVERY DAY** WE HARVEST
60-70 TONS OF RIPE, FRESH VEGETABLES

- 3.15 MILLION M² OF DRAINED, DRIP-IRRIGATED LAND
- 24 GREENHOUSES
- 25+ MILLION VEGETABLE PLANTS EACH YEAR

HOURS AFTER THAT, WE PRODUCE OUR NATURALLY DELICIOUS
PRODUCTS IN THE **THREE DERONI FACTORIES**

- VEGETABLES RIPENED IN THE SUN, GROWN WITH CLEAR WATER
- SATELLITE CONTROL SYSTEM FOR PLANTING, HOEING, PICKING
- THREE ANTI-HAIL SYSTEMS
